There is some sort of greenups in 2004
of say 5° coverage of pivot movement
The meadow low spot is green from
surface runoff as in the old days

Conclusion:

Transfer 79357 and 79380 should
be cancel immediately. Cedar Ridge
has been using this water since
Nov 2015.

Perrott. Brief

CV-42-2015-4552

2002 receipts indicate yes there was irrigation going on, backed by google earth image

After that receipts are sufficient to perhaps keep a swath for 3 cuttings of hay on 80 acres, such as the demo Bull farm

More directly, google earth maps^{used by USDA} show no green up from irrigation except meadow flooding from unusual spring run off in Mule Creek

The 2013 map shows a pivot frame, not moved as does the identical area image in 2009 and 2007 map

In 2004 a pivot is seen to the south of the home, trees and corral. there is NO north pivot (west of the house)

This is a timely Response Brief from Parrott
Issue —

Parrott continues to contend that Cedar Ridge Transfers were improperly granted based on IDWR granting 3 previous (unprotested) transfers from Leno.

The examination of facts, then and now would have forced IDWR to reject those 3 transfers.

There was a form of "scout's honor it's okay" message from Cedar Ridge Council to hearing officer Cafalo on that subject

As a 47 page document (submitted by Parrott but rejected by the Court)

covers that previous transfers and water use by Leno. we find acre feet use is based on gallons of Diesel on 2 receipts
